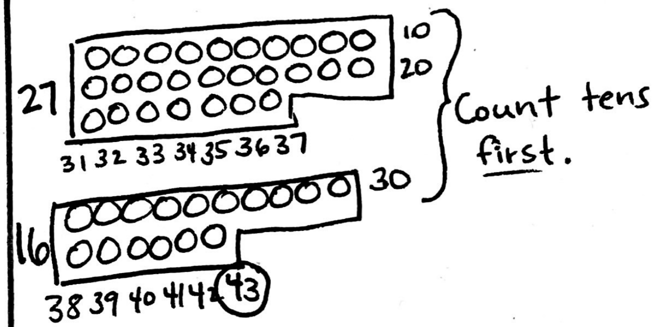
Addition Strategies +

sum
total
plus

Diagram

In second grade, we are working away from drawing pictures. However, if it is still necessary, children should draw in sets of 10.

27 + 16 = ___



Counting On

Start with the larger addend and count on by ones or in chunks.

27 + 16 = ___

By ones:

27 28 29 30 31 32 33 34 35 36 37 38 39 40 41 42 43

In chunks:

+10 +3 +3

27 37 40 43

Adding by Place Value

27 + 16 = ___

← First, decompose numbers by place

20 7 10 6

20 + 10 = 30

7 + 6 = 13

30 + 13 = 43

Compensation

Rearrange the amounts in each addend to make "friendly" numbers - numbers that end in ☺.

27 + 16 = ___

+3 -3

3

New Problem:

30 + 13 = 43

☆ You can combine these strategies in many ways - use what works for you!

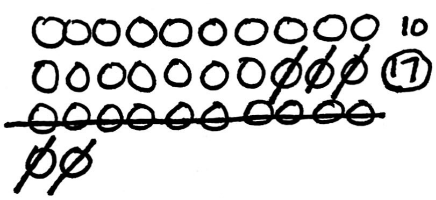
Subtraction Strategies

— minus
difference
left

Diagram

Use circles and draw in sets of ten. Cross out the amount being subtracted. Cross out in groups if you can.

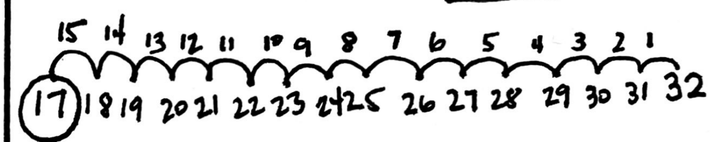
32-15= ___

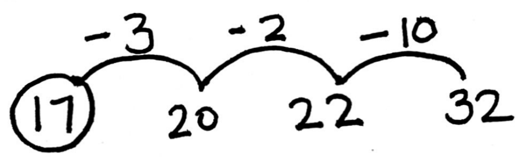


Count Back

Start on the right side of your paper and draw a numberline to count back by ones or in chunks.

32-15= ___





Subtract in Parts

Keep the larger number whole, then break up the smaller number to subtract in parts.

32-15= ___

10 5

32 - 10 = 22

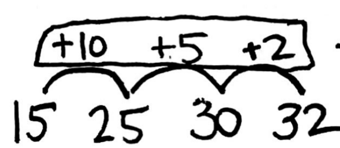
22 - 5 = 17

Add Up

Rearrange the subtraction problem into an addition problem with a missing addend, then add up to find the difference.

32-15= ___

15 + ___ = 32



→ 10+5+2=17
